The Daily Press

HONGKONG, SEPTEMBER 22ND, 1871

The non-official members of the Legislative Council will to-day be called upon to give their votes for the Estimates for 1872. No doubt all questions which may be asked will be as usual evaded; and the Colony by tomorrow will be saddled with the obligation to pay no less than \$540,000, to perpetuate the present system of inefficiency, extravagance and jobbery. No protests on the part of the non-official members will be of any avail. The terms upon which they sit in the Council are that they are invited to like it, or ordered to lump it. If they give their votes the Government is the better pleased with the moral support, but if they refuse to do so, the measures can still be passed. This is, of course, the secret of the gross abuses which creep into the administration in all directions. In the official eye the public is but the sponge out of which Military Contributions, Police Estimates, and bungling salaries are to be squeezed. Their wishes, their safety, their commercial welfare, are quite subordinate matters. Under such circumstances, it is not to be wondered at that Hongkong is—as it is—and it might be hoped that even in this distant part of the world such as system as that existing here could not go on for ever.

Encouraging as the subject has hitherto appeared, we do not yet despair of something being done. There have of late been signs of a growing public spirit and of a fixed determination on the part of many of the most influential members of the community to make a stand—respectful and temperate, but still firm and decided—against a system of Government which fails even to meet the ordinary requirements of protection and security, and which leaves the most important matters—such, for example, as the question of establishing a Chinese Custom House in Hongkong entirely unattended. The complaints of heavy taxation among the native residents are as loud as they are among the foreign portion of the Community, and there is no question that the maladministration is seriously affecting not only the security of the place, but also its trading interests. The Protector of Chinese recently asserted with great warmth in the Legislative Council that he had not proposed that a Chinese Custom House should be established in Hongkong, but why he was so much excited upon the subject is difficult to understand, seeing that when, some nine months ago, attention was called to the existence of a Salt Taxing office in one of the most prominent streets of the Colony, the Executive came to the conclusion that they could take no steps to put down the abuse; that the affair was a diplomatic question with the Canton Authorities; and to the present day the Salt-Taxing office remains unsupervised. Of course, if the Mandarins can set up a Salt Taxing establishment, there is nothing to prevent their making the same arrangements for levying taxes in other directions. A question of this kind ought to be properly dealt with for the \$1,658 per annum voted for the Registrar's Department; but it is involved in a complete fog, and cruisers and native squeezing flourishes unmolested, notwithstanding that the former Viceroy of Canton distinctly promised Sir RICHARD MACDONALD that no such tax should be levied. When at the last meeting of the Council one of the non-official members brought the subject forward, he was at once "sat upon" by four official members, and told it was not the matter before the meeting—and of course this question, or any similar one, will never be the question before the meeting, so long as the Government, for their own ends, can prevent it. In all these matters, as well as in the details regarding appointments, salaries, and the minor duties of administration, the public has for the last three or four years been insolently ignored. Not only have gentlemen of standing and influence been treated in a most cavalier manner, if they ventured to ask the well-paid officials any questions on points of finance or administration, but the non-official members of the Council have been systematically scolded down, if they ventured to open their mouths against the puffed-up and self-willed officials set over them, and paid by them. The position of a non-official member, we must confess, is not enviable. It does not speak out the public are discontented; if he do so, he is at once pounced down upon by the official Caste, which he knows can outvote him on every subject. This is not very encouraging, and it is not surprising that the majority of the members are disinclined to speak when there is so small a chance of their speaking being of any use; and in the same way, they may naturally feel that it is little use their recording adverse votes against a majority that can always override them. Perhaps they go a little further than is necessary in this view, as the opinion of the non-official members definitely recorded in the form of votes is not without its influence at home; but the feeling is a natural one, and the public must blame the system and not the individuals, if more is not done on their behalf by the non-official members of the Council. It is at least satisfactory to find that of late they have shown a disposition to speak plainly upon some of the more serious and long standing abuses in the Colony; and we cannot but hope that, with a knowledge of the strong feeling existing out of doors, the official members of the Council will be more disposed than they generally show themselves to be, to give at least a courteous hearing to what may be advanced in Council by their non-official colleagues. These gentlemen can have no other interest than that of the public to serve, and it is somewhat hard, if upon matters such as those of Police and Finance—matters immediately affecting their safety and their pockets—the public be precluded from having a fair and legitimate influence in the Government of the Colony.

We protest in the most unequivocal terms against this appointment—on principle; in regard to Mr. Ball individually, and in reference to existing circumstances in the Colony. On principle, because it is contrary to all precedent for any one to hold briefs after he has been appointed to the Bench; in regard to Mr. Ball individually, because it is well known that that gentleman's health is such as often to interfere with the performance of his present duties; in reference to existing circumstances, because it is generally understood that we may shortly look for the arrival of another barrister; and there can be no valid reason against the appointment being given to Mr. HAYTER, whose experience and talents quite qualify him for the post. Nothing appears to us, in the course of our researches, to indicate that Mr. Ball, who holds the office of Sheriff and still holds it from the Island of Poole, west one quarter from Tabo, used all means and made every exertion to get the ship off, but to no purpose. with marked attention. A vote of thanks to "Elder Frederick" terminated the proceedings; and those present, including the author and "Shaker," had been seated and called in. Subsequently, we addressed the names of his co-religionists. We understand that "Elder Frederick" is the first member of the Shaker Church who has been sent officially as a mission to England.—Times.

RAINS-OF-FIRE AND BLOOD.

In the south of the Deccan those rains known as rains of fire and blood, about which our ancestors were so deeply superstitious, still sometimes occur. Those who have had the opportunity of witnessing them state that the illusion is complete. On one occasion it is recorded that the rain was red with the blood of cattle, while in another the clouds were thick and sombre clouds; in the zenith, however, the sky retained all its purity. Suddenly a storm burst, and it appeared as if a fiery rain was falling, the sparks being on the point of setting the world in flames. No sooner had the sun set behind the horizon than this scintillating and brilliant appearance was transformed into a deep red, and bearing a strong resemblance to blood. This singular phenomenon, however, was merely owing to the reflection of the solar rays of light at a certain angle of incidence.—*Cassell's Illustrated Travels.*

MISCELLANEOUS.

The Pope has conferred upon Mr. M'Evoy, the senior member for the country of Meath, the Order of St. Gregory, in recognition of his services in assisting to obtain the repeal of the Ecclesiastical Titles Act.

DISTURBED REQUEST TO A CONVENT.—The validity of the request to a convent, which has not been determined in England, since the Reformation, is the subject of a decision by Vice-Chancellor Wigham, who has named Francis Manners left by his will considerable property to the Newport Catholic Chapel, the Brighton Catholic Chapel, the Dominican Convent at Chichester, the Sisters of the Charity of St. Paul, at Selby Oak, near Birmingham. The bequests of personally to the chapels were not disputed, and the question argued was whether the son, and the sisters of charity were capable of taking the shares of the estate. His Honour decided in favour of the two religious institutions.

A SERVANT'S LOANS.—An association has been started at Amherstover "for the suppression of the use of intoxicating drinks as beverages." Surely the association must have been seeing double when it perceived such a difference between "drinks" and "beverages" as this language would imply if taken in sober sense. It is just possible that the sentence was planned by a member of the third class in the association that class promising abstemious from intoxicating drinks, with the exception of porter, by a porter should be excused and condemned. One cannot see how the porter is blamed at Huddersfield, where the march is directed to the "compounding—for sins we are inclined to"—Fun.

Fox's SHORTHORN NOTTS.—Sham fight at Bushey Park. The sham was more like the real thing than the fight was.—House of Commons anxious to cut short its "August deliberations"—out of regard for the grouse.—Fuss about importation of spurious tea. Let's import! We don't drink tea, and declare the freedom of the teatotalers to poison themselves if they like.—Wimbleton Meeting.—Notices of the General Committee on Warmed Plates. People pulling fence down. Were themselves pulled up by it. Colonel Tomline has discovered an old Act of Parliament forbidding lawyers to represent sentenies. Is there no Act to preserve our Commons from geese and donkeys?

AN IRRESISTIBLE PROFLIGY.—A wealthy farmer, 69 years of age, going to look at his vineyards at Cognac, recently met a pretty looking girl, about 15 years old. When she passed him he spoke to her, and, charmed by her appearance, proceeded to kiss her. Unfortunately for him, the father of the girl came up at that moment, and, in great indignation at the affront offered to his daughter, administered a severe punishment to the young master, to leave him on the spot half dead. The result of what had occurred soon spread in the neighbourhood, and some relations of the old man came to his assistance; and, finding him insensible, carried him home. The father of the girl, however, was by no means satisfied that justice had been done, and accordingly proceeded to enter an action against the farmer for the assault. When the trial came on it appeared that the defendant had been compelled to do this, as the pretty woman he met in the district, but it is only fair to say that nothing was proved against him. The plaintiff was called a witness, and naively remarked that she was quite willing to be kissed every day of her life if she could be handsomely rewarded for it. The trial resulted in a verdict for the plaintiff for 100 francs, the amount claimed.—*Suisse Times*, July 21st.

COMMERCIAL INTELLIGENCE.

SEPTEMBER 21ST, EVENING.—The market for Bengal drap, Patna, has been a little excited under speculative influence. In fulfilment of time bazaar operations further advances have been made by the Banks for several hundred sheets, and in some cases as much as \$60 a sheet; loans have been obtained, it is said, at 6 per cent. interest per annum. At the opening, Patna was placed at \$677, on time due to-morrow by the speculators, against \$650 to \$675 from the 1st of September, and \$750 for the 1st of October, the 9th rate to arrive, at which the market closed yesterday. Benares is held for \$665 to \$670, the usual stock of which appears to be one or two loads. The English Mail steamer *Oriana* arrived this morning, with 1,700 chests Malwa, 10 chest Patna, and 40 chests Turkey opium. A telegram dated Calcutta the 20th instant, quotes Patna at \$1,400 rupees, with a small stock in Government godowns, of Patna, and a rate of about 1,400 rupees, with the stock of Benares at \$1,300, and Patna at \$1,200. The next English Mail steamer has about 1,300 chests Malwa, and about 300 chests Bengal opium.

SEPTEMBER 22ND, MORNING.—Patna, \$670 to \$675; Benares, \$655 to \$670, quoted. Patna, 9th rates on time, \$675; Malwa, \$670 to \$675. Market for Bengal, Patna, unduly subject to fluctuation under speculative influence.
